Replying to a question. Dr. Michaelis said that in his opinion Germany is done for all time with militarism, but he immediately modified this by saying, that "attempts to crush Germany do not conduce to a feeling that the military must be ignored." In further commenting on the military question in Germany, he seemed to have the conviction that all talk of a military Germany in the future is inspired by enemy sources, as, he said, "Why talk of a military Germany? The Allies will prevent that; they have the force and the will to do it."

German industry will quickly recover if given opportunity, he said, and this recovery, he insisted, will immediately prove the source of better conditions throughout the world.

Explaining that he has been absent from Germany for nearly six months and that recent events there are not clear to him. Dr. Michaelis paid tribute to Rathenau, "as a man of great ability and a true patriot, although," he added, "he is not of my party."

SETS COUNTRY BACK

"Race hatred." he said, and "the rash act of young fanatics rather than any group of monarchists, must be held for this deplorable murder. It will prove very detrimental to Germany. It will set us back one, two years. This murder makes all the harder our course toward economic peace."

Asserting that a constitutional monarchy is the best form of government in Germany. Dr. Michaelis confidently predicted the development of such a form of government as a logical consequence of restored normal conditions.

"But we will not bring back our such as the said. He stressed the importance of proper training, saying that it was essential. He explained that the splendid record made by the said. He splendid record made by the splendi

OHIO SWARMING WITH ASPIRANTS

State This Year Regular Political Beehive

Scores of Candidates Run for Same Office

Vocational Education" Fess Opposes Pomerene

BY GRAFTON 8. WILCOX [EXCLUSIVE DISPARCE] COLUMBUS, June 27.—Ohio,

summer the largest flock of Republican aspirants for political favors in her history. That means considerable because Ohio has never been backward.

Four of Ohio's sons are seeking the Republican nomination for United States Senator to succeed Pomerene, the incumbent, who will be renominated by the Democrats. Nine Republicans, every one of them convinced that he is entitled on his record to substantial recognition, are appealing to the Republican voters for the nomination to succeed Gov. H. L. Davis, who is not a candidate for renomination.

SCORES RUNNING Literally scores are running for Congressional nominations in the twenty-two districts of the State. For every minor State office there are candidates galore and when it comes to county offices, the party leaders have despairingly stopped counting the candidates.

In some counties it is authoritatively disclosed there are as many as twenty candidates for the same office. Fifteen Republicans want to be the nominee for Sheriff in one county.

Season May 38 to mept. 15. Write for rates and folders. \$4.50 per day and up. American plan.

Revolutionary Records Are Woven Around Spot

Vew York Millionaire Paid for Restoration

NEW YORK, June 27.—Prac NEW YORK, June 27.—Practically as it stood in the early days of the Revolutionary War, when Gen. Ethan Allen rushed into Capt. De La Plase's sleeping-room and demanded surrender "in the name of Jehova and the Continental Congress." Fort Ticonderoga has

been restored.

A New York banker and a New York architect have accomplished this task at a cost of more than a quarter million dollars, and the site of fourteen engagements and changes of nationality since the time of the Chevalier Champlain is now a park full of historic sentiment.

SAW ITS POSSIBILITY
About 1820 the sits with its ruins came into possession of the Pell family of New York City. The ruins stood in crumbling masses until 1999, when Alfred G. Bossom, an architect, saw the possibility of making this a monument to Revolutionary history. The Pells became interested at once and retained Mr. Bossom to accomplish the restoration.
While the completed work is in the nature of a public memorial, it is a private property, being deeded by R. M. B. Pell to his heirs.
The actual and physical work of restoration has been but a small part of the labor. In many cases the structures have been completely rased, and it has required several years' research and investigation and interviewing descendants of the actual neighbors to get true ideas of the buildings of the fortas they were in Revolutionary days.

LABOR INVOLVED As an illustration of the labor involved in this particular it was found there were not any cannon in this country that could be made available of the type used on the bastions of the fort at that tima. There were those at Woolwich Arsenal in England. The laws of the realim preclude the grant of such guns, so they were sold to the Pelis at the rate of a penny sterling per ton, and now are in place on the bastions.

While none of the buildings are wholly in the original state, none are wholly new. Even in the tiling of the roofs much of the marketial was salvaged from the ruins.

Ku Klux Would be Government Says Woolwine

SAN BERNARDINO, June 27. Before an audience of several hundred this evening at Pioneer Park. Thomas Lee Woolwine opened his campaign for the Democratic nomination for Governor. He was efforted to this city by a dozen automobile loads of admirers and delegations were present from all surrounding towns. There was red fire, band music and a parade. Mr. Woolwine especially condemned the masked orders as un-American, referring to the Ku Klux Klan as an organization that would arrogate to itself the prerogatives of government, especially when its members think that public officials are not enforcing the law.

Drives Auto into Trailer; Meets Death

"Times" Staff Correspondent [EXCLUSIVE DEPARCE.] LONG BEACH, June 27.—Driv-LONG BEACH, June 27.—Driving his automobile at terrific speed into a trailer of a truck on Long Beach Boulevard tonight, G. D. Morrison, a carpienter living at 1912 Walnut avenue, was killed almost instantly when the lumber on the trailer, released by the impact, was dumped upon his machine, crushing at and mashing his head. A bottle of whisky, almost empty, was in the machine and was not damaged. The trailer and the lumber truck, the latter driven by Lester Wilkinson, were found to be properly equipped with lights and on the right side of the road. Morrison's body was taken to the Grote & Comer mortuary.

Disappears as Three are Hurt

An automobile, the driver of which was apparently intoxicated, collided with another automobile in Sawtelle late last night, injuring three persons. The driver disappeared immediately after the collision. The injured are Mr. and Mrs. Charles Hull of 1736 West Seventy-sixth street, Los Angeles, and their daughter, Dorris. All received numerous cuts and bruises. Mr. Hull was taken to St. Catherine's Hespital, Santa Monica. Mrs. Hull and her daughter wers given medical treatment at Mrs. Martin's Sanitarium. Both machines were wracked.

RACE WITH FAST TRAIN

Herculean Efforts to Save Life of Railroad Man Are

YUMA, June 27.—Passengers and crew of Southern Pacific passenger train No. 1 arriving here early this morning, told of a race between a fast-flying epecial train and death, with death the victor, near Gila Bend, Arisona, late last night.

Walter Hill, veteran brakeman employed by the Southern Pacific Company, was run over by a train in the yards at Gila Bend Monday night. One arm and one leg were severed, and he received other injuries. A special train was made up and started for Tucson, 126 miles away. Trains carrying cantaloupes from Imperial Valley to the eastern market, and ordinarily given the right of way over every other class of trains, were headed into sidings for the special. Passenger trains waited at little way stations, and the special hurtled in. With the purney half over death overtook the special and Hill's corpse was carried to Tucson.

is Dispelled

By a "Times" Staff Correspondent [EXCLUSIVE DISPAYCE.]

PASADENA, June 27.—Ruth Karns, aged 19 years, of 1947 North Marengo avenue, and Lloyde Bullen of 275 Summit avenue, caused their relatives here much concern by slipping away to San Diego to wed without saying a word about it. The girl's sister notified the police today that she was missing and had not been seen since yesterday noon, but the mystery was solved tonight when Bullen's father telegraphed from San Diego: "the kids are here," and he has decided not to interfere with their plans.

The young people have been engaged some time and there was no opposition to their marriage. The bride is the daughter of L. L. Karns, a retired teacher. She had been nursing her brother through a slight illness, which excited the more wonder at her leaving so unceremoniously.

SWING BILL COMMITTEE COMPLETES HEARINGS

AUGUST 1

WASHINGTON, June 27.—Hearings by the House Irrigation Com-mittee on the Swing bill, which will row, will, in the opinion of mem

row, will, in the opinion of members of the committee, tend to promote an agreement in the Colorado River commission upon a general plan for the distribution of the waters of the river among the seven States in its basin.

The commission will meet at Santa Fe, N. M., August I, when the record of the hearings on the Swing bill, which would provide for improvements in which California, Arizona and Navada, are interested, will be placed before it. Members of the committee also stated today that the recent decision of the Supreme Court in the Wyoming-Colorado case would also probably expedite action by the commission.

The court in that opinion held that water rights downstream acquired by usage become vested and gave a priority which could not subsequently be taken away, or impaired by the diversion of water upstream.

his automobile at terrific speed a trailer of a truck on Long ich Boulevard tonight, G. D. Prison, a carpienter living at 1912 inut avenue, was killed almost antly when the lumber on the lier, released by the impact, dumped upon his machine, shing at and mashing his head, bottle of whisky, almost emp-was in the machine and was not naged. The trailer and the lumbruck, the latter driven by Les-Wilkinson, were found to be perly equipped with lights and the right side of the road. Morn's body was taken to the Grote Comer mortuary.

**Sappears as I have a project be launched by the Federal government in advance of the adoption by Congress of a general comprehensive plan for the entire river, they added, the water impounded and diverted at Boulder Cariyon, or wherever the dam might be located, would become vested and have priority of right over any improvements subsequently late late late to the same above Boulder Canyon.

Members of the House committee

FILIPINOS INVESTIGATED

Gov. Gen. Wood Makes Personal Trip Gathering Data Concerning Independence Possibilities

BY WALTER ROBB [BY CABLE—EXCLUSIVE DISPATCH.]

MANILA, June 27,-After returning from circus

bowever, awaiting word from the parent body here.

LEAVES NATIVE WIVES
Haddi Gulamu Rasul, son of the Sultan of Sulu's ex-Secretary of State, accompanied by his American wife, formerly Elma Stewart of Washington, salied for Japan, Australia and Europa. Before leaving, he publicly said that they would not return to the Philippines will be abolished if the next sension of the Legislature while there is an American Governor-General in control nor until the coveted independence had been secured. Two native wives were left behind.

TAX DATE EXTENDED (ST A P. DAY WIRE)
MANILA, June 27.—Gov.-Gen.
Leonard Wood, for the second time this year, extended the final date for payment of land taxes, this time to July 31.

The extension was granted, it-was justice of the peace.

GETS MUSCLE SHOALS BILL

Measure for Work on Dam Passed by Congress and Sent to President Harding for Signature

WASHINGTON, June 27.—President Harding's signature was all that was required tonight for authorizing the appropriation of 57,500.

900 for new work on the Muscle Shoals dams at Muscle Shoals. Also the Army bill containing authority from Congress to spend the money on that project, effective October 1, next, was passed today by the Senate without a change in the language already approved by the House and by conferees of the two executive bodies.

in old son, Harold, to a secluded spot
a half-mile from his residence
early this morning and there shot
the child. After throwing the
body of the child into an irrigation
ditch, Nelson turned the gun on
himself.

Neighbors hearing the shots
rushed to the scene and found the
body of Nelson lying on the bank
of the irrigation ditch. Several
hours later firemen, who were instructed to drag the ditch, found
the dead body of the child.

Mrs. Nelson was prostrated with
grief when news of the tragedy
was communicated to her and she
could give no reason for the shooting, other than that her husband
must have gone insane.

She told the authorities that she
was still in bed when her husband
left with their child agd that she
did not learn they had left until

WOULD RESCIND RAIL. BOARD WAGE ORDER

IN HOUSE BY FORMER
CONDUCTOR

(FT A. P. MOST WEEL)
WASHINGTON, June 27.—
joint resolution which would a
thorize the Railroad Labor Boa
to rescind its decision reducing t
wages of railroad employes of
fective July 1, was introduced
the House today by Represent
tive Burks. Remublices (Park

the House today by Representative Burks, Republican, (Penn.) a member of the order of Railroad Conductors of the Baltimore and Ohio system.

The Burks resolution embodied a declaration that "the decision of the board savors so much of one sided justice and has caused such dissatisfaction and discontent that a strike seems both imminent and inevitable."

It also asserted that "the standard of living cannot be maintained upon a minimum wage proposed by the board of 12 cents an hour or \$1.54 a day."

Declaring that the reduction in wages proposed would affect 1,500,-000 workers, the resolutions asserted that the wages fixed by the board would institute "a Chinese standard of labor, which would be repugnant to the American people, who believe in just wages and decent working con-ditions."

An Ancient Oriental Beauty Secret Rediscovered

THE preservation and inhancement of beauty was a religious duty in ahcient Egypt, Persia and India.

Century after century was men and priests devoted their lives to the study of tonics and essences that would not only add to beauty but preserve it indefinitely.

The greatest discovery of these wise men was the marvelous beautifying effect of the henna leaf, and now—after centuries of time—modern beauty specialists have rediscovered the great secret of the use of henna—how it can best be employed to bring life, lustre and radiance to the heir by combining the henna with a liquid shampool

What Henna Does for Your Hair When the henna tonic herb is combined with a pure, cleansing vegetable oil shampoo, as it is in Lura Liquid Henna Shampoo, you get double benefit of the henna! First of all it brightens and beautifies the hair, as nothing else can do, bringing out all it to rich sheen and golden gloss. Then it acts as a scalp tonic, invigorating the hair to healthy growth, clearing away every trace of scarr and dandruff. As the henna is blended at the shampoo in just the proper quantity, i you follow the simple directions you are a solutely sure of getting a rich, glossy, been ming effect. In your home, at a trifle of the cast, you can give your hair the same henna to ic and beautifying treatment that the small beautifying treatment that the small beauty establishments are using continually.

How to Use Lury Liquid Henna Shan poo

The directions are very single, and, in addition to this outline, are print d in full on each package of shampoo. Men, somen and children use Lura with equal fectiveness. It works up into a rich, clean sing lather that thoroughly and completely uts the grease—cleansing the scalp as well at the hair. For a general cleansing and tonic sampoo, wet the hair thoroughly, then pour in the head completely.

rinse with hot water; since again with cool water, and finish with a dash of cold water to close the pores and arouse the blood to a healthy, vigorous action. Use plenty of water—this is important!

To Bring Out the Sunshiny Glint

-Not Changing the Color

Wet the hair thoroughly. Pour one tablespoonful of Lura Henna Shampoo on hair,
massage vigorously, loosening all dirt and
dandruff. Rinse well Squeeze water from
hair so it will not drip. Then apply another
tablespoonful of shampoo and distribute
everly. Do not rub. Do not apply more
water, but allow shampoo to remain on hair
for 3 to 15 minutes; then apply water, massage and rinse thoroughly. Use plenty of
water. By regular use of this method the
hair will gradually take on the alky shoen
and golden lustre that only hanns can give.

To Prove Our Statements A FREE Bottle of Lura

This FREE bottle is waiting for you at any one of the stores listed below. We strongly urge you to make this test. Try Lura yourself—then you'll know what it can do! Cut out the coupon NOW and get the generous Free Test Bottle. Give your hair the benefit of Lura, and you'll watch with delightful aston-ishment the improvement in its appearance.

Exactly the same figs, cleaning shampoo, blended of purset vegetable oils, but without the hemma. If you prefer a plain shampoo and do not require the tonic action of the hemma, we strongly recommend Lura Ideal Shampoo, Without Hemns. Free test bottles of either shampoo. Try it.

The Sinclair Cons dustry. Dating back only to found an active position in the market partly on account of pool operations. But in recent months attention has been attracted to the stock Company of Indiana to which Sinclair sold a half interest in the Sinclair Pipeline Com-

and gas leases in Kansas. Oklahoma, Texas, Louisiana and Mexico. Just recently a concession in Portuguese Africa was granted the company. On the basis of an unproven valuation of \$243,net assets applicable to the common stock on Dec. \$1, 1921, were equal to \$54.12 a of stock. On the retirement will have a funded debt of \$50,851,000 and an indirect liability for the \$30,000,000 of Sinclair Crude Oil Purchasing Company notes. Holders of Sinclair common received 4 per cent'in stock in 1919 and an equal amount in 1920 and the company has declared an initial divi-

poration to Dec. 31, 1921, aggrerated \$20,477,000 or \$5.03 a share on the largest amount of common stock outstanding. Range of stock; high, 64 1-4 in 1919; low, 16 1-8 in 1921; yester-

Net earnings from incor-

district declined one-fourth to one-haif of 1 per cent during the month.

Building activity continues at record figures, the number of permits issued during May having been exceeded only in one month. October, 1921. Permits issued were 22.1 per cent greater in number and 59.1 per cent greater in number and 59.1 per cent greater in value than in May, 1921. Debits to individual accounts in the district were 3.1 per cent greater in the four weeks ending May 21, 1922, than in the same four weeks

Sinclair Consolidated New First National Bank of Hollywood and operate it as an agency. Comprising the content of the First National officials, authorizing them to take this step.

Mr. Dodge, who was largely instrumental in bringing about this strumental i

HELLMAN EXPANSION

Announcement was made yes-terday by the directors of the Hell-man Commercial Trust and Sav-ings Bank of the absorption by that institution of the Industrial and Savings Bank of Vernon, together with its two branches, in Huntington Park and Bell. For sev-Huntington Park and Bell. For several years the Vernon institution has been an active factor in the commercial and industrial activities of the Vernon district and its directorate is made up of a number of men who have long been identified with the Southern California banking field. The Vernon Bank acquired the Huntington Park Bank in December, 1921.

In announcing the merger, Irving H. Hellman, vice-president of the Hellman Commercial Trust and Savings Bank, explained that the Vernon and Huntington Park banks would be conducted in the future by an advisory committee selected from the board of directors of these institutions. This will mean that men identified with these local interests will have a voice in the active management.

This merger marks the fifteenth

with these local Interests will have a voice in the active—management.

This merger marks the fifteenth branch bank now established by the Hellman institution. These branches now cover virtually every developed neighborhood in Los Angeles in addition to branches at Riverside, Redlands, Palos Verdes, Long Beach and Redondo Beach. In the nine years since the Hellman Bank took over the Night and Day Bank at Sixth and Main streets, it has grown into an institution with more than 110,000 depositors. Marco H. Hellman is president, Irving H. Hellman is vice-president, and the following well-known men are included on the board of directors. Benjamin E. Page, Louis M. Cole, H. H. Cotton, J. A. Talbot, T. J. Fleming, C. C. Fryman, M. A. Hamburger, Henderson Hayward, Harry L Harris, James W. Hellman, I, L. Hibbard, W. F. Howard, A. F. Morlan, James Shultz, E. W. Sargent and Willard H. Stimson.

THE BOND MARKET

Consistent steadiness is being displayed by bond prices, but they do not show much tendency to go any higher at present. Many economic observers think that interest rates have just about touched

CANNOT GET JURYMEN TO Shut in America TRY MURPHY Homeland Has 429 Persons

to Square Mile Labor-Unionism and Too Much Publicity Keep Jury Box Empty

(EXCLUSIVE DISPATCE.)
CHICAGO, June 27. -- Nobody,
wants to try "Big Tim" Murphy,
Fred Mader and "Con" Shea for

hat taberty 44 in 2mb Liberty 44 in 2mb Liberty 44 in 2md Liberty 44 in 4th Liberty 44 in 2mb Viciney 44 in 2mb Viciney 44 in

Fred Mader and "Con" Shea for the latest statistics show that there the murder of Policeman Terrence Lyons.

Attorneys who have been questioning veniremen for the last two weeks quizzed the 286th man today, and found him lacking in qualifications. Then they wiped their brows, took a drink of water and looked around for the 287th. But there were no more veniremen in court, and the session had to be overflow. adjourned.
So far 400 men have been called and not one man has been sworn in. Some failed to answer the sunmons, others were excused by the court, and the remainder were challenged

others were excused by the court, and the remainder were challenged if for cause.

Last night four men had been to tentatively accepted by both the prosecution and the defense.

This morning the defense questioned two of these four and then decided that they were unfit. A challenge for cause was made and the judge dismissed them.

The third of the quartet was too ill fo come to court, and the fourth announced that his wife was about to present him with a child. Both were excused and the jury box was empty, again putting the case back where it started.

The difficulty in getting jurors was attributed to the publicity the murder and the defendants have received, and the fact that the sympathies of veniremen toward organized labor make many of them unacceptable to the State.

In Judge Caverly's court a motion of the State Attorney's office to expunge the record in the first trial of Simon O'Donnell, former head of the building trades council, was allowed. This was a preliminary step toward bringing O'Donnell to trial again on a new indictment, said to have been voted against him yesterday.

TELLS OF ATTEMPT TO KILL M. LENIN

WOMAN WHO WOUNDED RED PREMIER DIES BEFORE FIRING SQUAD

THE HAGUE, June 27 .- Europe's present spasm of assassina-tions, coupled with the continued rope's present spasm of assassinations, coupled with the continued reports of Premier Lenin's ill health, adds interest to the story of the attempted assassination of the Russian dictator. Today I saked a member of the soviet delegation for the actual facts. He stated the case as follows:

"Premier Lenin is suffering at present from bullet wounds received when he was shot by a woman, Dora Kaplan. She was social revolutionary. She was social revolutionary. She was executed for her crime after she had been found guilty by a revolutionary tribunal of justice.

"The attempt on M. Lenin's life occurred in July, 1918, in an electrical factory in an industrial suburb of Moscow. It was the custom at that time for the people's commissars to make a public report to the workers Friday afternoons. It was 6 o'clock in the evening when M. Lenin's internoons and another in his stomach. Two shots missed. M. Lenin's life hung by a thread for two months. The workmen mobbed the woman assassin and almost killed her. She was not

MAJ.-GEN. MORTON SAILS FOR ALASKA

WILL VISIT ALASKA AND SEV. ERAL CANTONMENTS ON HIS TRIP

BAN FRANCISCO, June 27,-SAN FRANCISCO, June 27.—
Maj.-Gen. Charles G. Morton, commanding the Ninth. Corpe Army Area, departed on the United States Army transport Buford today for an inspection trip of North-western and Alaska Army posts and to formally close the canton-ment of Camp Lewis, near Tacoma, Wash., as a Regular Army rendezvous. A number of other posts in the territory visited, which have been abandoned by the War Department, will be closed by Gen. Morton, on the return trip. The small Army detachment new at that post will return to San Francisco with him.

CAMP LEWIS (Wash.) June 27.

CAMP LEWIS (Wash.) June 27.
The report from San Francisco that Maj.-Gen. Charles G. Morton will soon visit Camp Lewis and formally close the cantonment was declared to be a mistake by Army officers here today.

"Army orders are that from 1806 to 2000 soldiers will be retained at Camp Lewis," Col. J. D. Leitch, chief of staff here, said when informed of the report. "Specific orders have been received that Camp Lewis will not be abandoned."

Col. Leitch said Army orders provide that only a small number of the troops here shall return with Gen. Morton to San Francisco.

Osaka Newspaper Says Doors

OSAKA (Japan) May 22.—Th English edition of the Osaka Mainichl, the only foreign newssively by Japanese claiming that

AMERICAN DOORS CLOSED

AMERICAN DOORS CLOSED

"Both the United States and Canada keep their doors shut ugainst the Japanese people, and it would be impossible for the Japanese to emigrate into those countries," says the Mainlichi. "It is true that there are Manchuria and Siberia left for Japanese emigrants, but these are rather places for capitalists to exploit than for laborers.

"Under present circumstances, it seems that South America offers

fore be said that the key to the solution of the present difficulty apropos of the population question in Japan lies in the emigration of the Japanese people to that country.

"As a matter of fact, emigration to South America has long been going on, as is seen in the presence of many Japanese in Brasil and in heighboring countries, but it has hitherto been carried on in a very half-hearted manner.

LED MISERABLE LIVES

LED MISERABLE LIVES
"The majority of the Japanese emigrants to South America were poor laborers without capital and without any capable leaders, and the result was that they did not succeed, and led miserable lives there. It will, therefore be seen, that the present method of emigration to South America should be radically improved so as to make it a success."

Several parties of Japanese, going to the centennial exhibition at Rio Janeiro are to look into the possibility of Japanese settling in

See today's Times' Want-Ada

SIXTY THOUSAND DOLLARS

SIX DAYS!

Thanks, Folks, each and every one of you Red-Blooded Americans that have stepped up and so cheerfully bet your money on me to win. I appreciate your confidence more than mere words can begin to tell you. The odds today look like 1000 to 1 in our favor for a big well at

SANTA FE SPRINGS

And if every dollar you shoot with me does not bring you a return of 100% each month for a long time, there is no investment in the world that will.

Do you all know that I am not trying to hog this proposition?

Do you all know that no "bird" ever before to my knowledge, came out and offered to bet his money, dollar for dollar, right on the line with yours? Do you fully know that this is exactly

Do you know that I have refused \$100,000.00 for the lease I am drilling this first well on and can sell it five times over this minute for that amount?

Do you know that I have 4 acres of the choicest proven territory in the very heart of the big production at Santa Fe Springs, laying between two 4000 barrel wells?

Do you know that I am going to drill three wells on this tract and that you have the privilege of participating with me in each one, based on the actual cost of drilling them?

Do you know that I have a Gentleman's agreement with the four big companies on every side of me to stay back 150 feet from our property line, which means that no well of theirswill be closer to mine than 300 feet, or one city block apart?

Do you know that I am only calling for \$175,000 to insure the completion of the drilling of this first well?

of this first well? Do you know how I am spending this money?

Do you know that the actual cost of completing a well at Santa Fe Springs is at least

\$125,000.00? Do you know that I am drilling in an orange grove, where I have to pay \$100.00 each for every tree I destroy, and that to set my rig, my boilers, my sump holes, storage tanks, roads and casing racks that I have to chop down 200 trees?

Do you know that I am paying my fifteen picked drillers top wages and a cash bonus of \$2000.00 on this well?

Do you know that my messages to you through the press will cost at least \$12,000.00?

Do you know that I stake my reputation and every dollar I have in the world on my promise to complete this well and put it on production?

Do you know that I am assigning to you 70% of my total net production from this first well on one-third of my holdings and that this assignment will be held in trust by one of the leading Banks of Los Angeles, who will collect the proceeds from this production direct from the pipe line company and distribute same to you every thirty days?

Do you know that the protection I have doped out for you is absolutely "air tight" and that I have bet every dime I have in the world that I cannot miss here?

Do you know that every \$100.00 you invest will bring you an assignment, legally executed and recorded, of 1-1750 part of 70% of my total net production and that you can go to the end of the world and not return for ten years and every penny of yours will be in the Bank awaiting your return? awaiting your return?

Do you know that my rig is up, my boilers set and that I start drilling immediately I am rigged up and expect to have my well flowing into the tanks in 90 days?

Do you know that I have pledged my word of honor to you that there is no incentive in this world could make me betray the confidence that you place in me, and until our well is flowing into the tanks you will find me, night and day, on the job in the field protecting that bet you placed on me to win?

Folks, if you would only realize how truly sincere I am trying to be with you, this would be the last message I would have to send. I would be oversubscribed today.

Don't wait until tomorrow. Mail your check to me today or run in and meet me personally.

HELPING THE DICTIONARY
A municipality having to extend the electric supply mains called a meeting to consider estimates. The chief engineer had been called away, but the work was carried on in his absence. One of the items in the estimate was for "potential wires." A councillor asked, "What are potential wires." No one knew. The clerk thought of consulting a dictionary. "Potential" was found and the meaning, "existing in possibility but not in reality," was decided to be the one applicable. That was the best they could do, so the Council passed in the estimates, 4200 for "potential wires, or wires existing in possibility but not in reality."—[Exchange.]

CAMPAIGN OF FACTS

JEGAL NOTICES—
Bible Proposed Control of the Co With the control of the Central Pacific, the Union Pacific would be a real competitor. It is, however, very unusual and startling to she that apparently the first impression of the community upon the announcement of a possible competitor of the existing system seems to be one of alarm.

"In view of the fact that the United States Spreme Court after thorough consideration declared the law to be in favor of the separation of the Central Pacific from the Southern Pacific and that Prof. William S. Ripley of Harvard University, one of the outstanding authorities on secondical who was employed as an independent sipsyt advisor to the Interstate Commerce Commission to make a study and report covering the situation, recommended such severance as seconomically the sound thing to do, it is inconceivable that the people of this State with information limited to the statement of a competities which is confessedly and naturally hostlie to the coming of the Union Pacific, should be unwilling to at least suspend their Judgment and verdict until more fully informed."

PREMENT LAWS

(97 A. P. 20037 WIRE.)

RENO, June 27.—Adoption of a State platform and the selection of a State central committee cornpied the attention of delegates from all parts of the State to the State Democratic convention which went into esseion this morning. Late this afternoon W. G. McAdon was to deliver a brief address at the convention. He will speak at a public meeting tonight on the tariff.

The platform charges the Republican party with neglecting the welfare of the war voterand recommends the immediate report of the Esch-Commins law, and pledges the Democratic normal for places in congress to vote in a federive and constitutional corrupt practices act.

Customs Head Secures Coast

I IN THE TIMES

Most-Talked-About Story of Year Will Begin in Next Sunday's Marsaine
Beginning in next Sunday's Hustrated Magazine supplement The Times will publish "The Sheik," a sensational love story written by Edith M. Hull and the most-talked-about book of many months. The story will be continued in the daily and Sunday issues. Women everywhere have found a tremendous appeal in "The Sheik" and comment upon the situations so strikingly drawn by the author has reached almost to the point of controversy in literary circles. The story deals with the deepset human emotions, and its characters stand out with fiery relief. A rich and hear present of the strike in the st and its characters stand out with flery relief. A rich and beautiful girl, head-strong and independent, is captured by a wild, unbridled but educated Arab shelk. From a beginning based on the most brutal of passions, a strange romance rears itself and the reader a carried through an amazing but convincing series of adventures. Will you agree that a girl in Diana Mayo's position could have been swayed as she was swayed? Could a great love be born under the conditions the author has depicted? Don't miss this compelling story.

ENTITLED TO LIVING
The North Dakota Senator argued that the farm workers were as much entitled to a living wage as the workers in the city whose wages and standard of living. Wage and that he has secured a guard boat for use in chaining terr and other violators of rederal laws. The vessel is ber expressed the opinion that not be opinion that not be the proposed increases in tariffs on farm products would be passed on to the consumer, but asserted that even if they were, the city man with a wage ranging to pay out a "few cents excluded by willing to pay out a "few cents excluded by the consumer of the proposed increases in tariffs on farm products would be passed on to the consumer, but asserted that even if they were, the city man with a wage ranging to pay out a "few cents excluded by the consumer of the proposed increases in tariffs on farm products would be passed on to the consumer, but asserted that even if they were, the city man with a wage ranging to pay out a "few cents excluded by the consumer of the proposed increases in tariffs on farm products would be passed on to the consumer, but asserted that even if they were, the city man with a wage ranging the wage of the opinion that not a pay the consumer of the proposed increases in tariffs on farm products would be passed on to the consumer. ENTITLED TO LIVING

Submits Case of Disbarred Local Lawyer

Oscar Lawier appeared as a representative of the Bar Association before Department No. 3. District Court of Appeal, yesterday, opposing the petition of Walter H. Stevens, who is seeking reinstatement as a member of the local bar. J. D. Randles appeared in behalf of Stevens, who is now an employee of the Los Angeles Railway Company.

Stevens was convicted in the Federal Courts of using the mails to defraud with Charles S. Mc-Kelvey, and was given a six months' term in the County Jail by Judge Trippet and a fine of \$2500, in September, 1915. An appeal was taken and the judgment of the court below was affirmed by the United States Circuit Court. Then Stevens and Mc-Kelvey served their time in the County Jail. President Wilson later issued a pardon to Stevens, restoring his civil rights. Both men were disbarred following their conviction. The case was submitted after argument.

to the attention of the jury-by the defense.

Mrs. Irene Smith recounted her brief relations with Mrs. Openchain while the two were confined in the County Jall.

Under the direction of Dep. Dist.-Atty. McCartney, Mrs. Smith related little things that, it was heped, would throw some light on the murder of Kennedy.

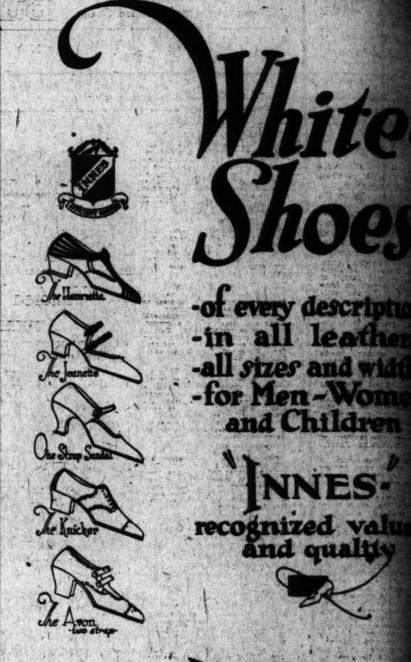

She declared that Madalynne once charged that "the reason Mrs. Kennedy collapses and Mr. Kennedy is so bitter is because they had something to de with the murder—that they murdered their own son to get even with her and that is why they are pronecuting her."

THE SIMPLEST FORM OF LIFE

BY CHARLES LINCOLN EDWARDS, Ph.D.

Director of Nature Study.

A drop of water from a starnant pool by the readside contains
a wenderful little world of living
things. They are so small that
one must look through a microscope to see them. Some dart
here and there, while others spin
around like tops. An occasional
individual flows along like a drop
of jelly. These minute plants and
aulmais live and move in the drop
of water as truly as elephants or
chickens do on land.

The smallest and simplest of all
these living things are bacteria.
Some resemble spherical dots,
some straight rods and others are
twisted into spirals. Pasteur investigated bacteria for over seventy years and has done most te
establish the science of bacteriology.

A bacterium is a single cell
it possible for man to live on the

A becterium is a single cell made up of living matter, just as is each of the million cells composing our own bodies. In one species it would take 25,000, placed and to end, to cover an inch in length. Others are too small to be seen with even the best microscopes and yet we know they exist by the results of their growth. Generally, bacteria are placed in the plant kringdom and yet they are really simpler than either plants or animals, forming by themselves the lowest branch of living things connecting plants and animals. The first simple living things connecting plants and animals are evidence of the lisuses which decay. Fermenting substances are thrown of from the bacteria and these break down or dissolve the tissues. Bacteria constitute the group of living things connecting plants and animals. The first simple living things connecting plants have belonged to this group.

A bacterium multiplies by dividing into two parts and then each of these parts divides and so on. This division may occur every twenty minutes. If the germ divides only once an hour and could go on unchecked 281,500,000,000 of descendants would be reproduced in the course of two days. By the end of five days the offspring of one original germ would fill a space equal to that occupied by the waters of all the oceans.

WARFARE OF BACTERIA Such normous multiplication does not continue, since the germs use up the supply of food and give of foul and poisonous matters which check their own growth. As among all species of animals and plants, the different kinds of baccing foul. Many hacteria have little whiplified for are pushed about by the swinning forms.

WARFARE OF BACTERIA Such normous multiplication does not continue, since the germ divided to the surmous and simply drift or are pushed about by an among all species of animals and plants, the different kinds of baccing forms.

Often after the swinning forms.

Often after the swinning hacteria, to time the swinning forms.

Often after the swinning health of the swinning forms.

Often after the

WARFARE OF BACTERIA

Such enormous multiplication does not continue, since the germs use up the supply of food and give off foul and poisonous matters which check their own growth. As among all species of animals and plants, the different kinds of bacteria fight one another for food and a place in which to live. In this struggle for enistence the weapons are not the claws and jaws of higher forms, but simply the poisonous chemical products thrown off in the life of each bacterium. Thus billions of the weaker die that the strong may survive.

We may plant bacteris on gelatine or slices of potate contained in covered dishes which have been sterilized by heat. After a few days the billions of descendants from each germ originally planted from a colony which can be easily seen without a microscope.

Bacteria occur everywhere, carried with the dust through the air, floating in the water of ponds, rivers and the sea. buried in the soil, imprisoned in ice or perhaps thriving is the warmth and abundant food supplies of our own mouths, guilets, stomachs and intestines.

It was the belief of our ancient ancestors, as of savage iribes to day, that disease is caused by the possession of the body by a deposition. The typhoid germ travels 2000 times its own length in tone hour. Many kinds of bacteria it one hour. Many

"Any Nash Can Do It"

TROY MOTOR SALES CO. Los Angeles Pico 1823

Almost 5000 OWNERS Southern California

This Coast League race is decidedly spotted and has lost so f that fine balance which featured it for the first couple of months Whether it is as fast throughout as last season is a question. Posalbly it is as a whole, with one or two teams faster. Or one can look at it from the angle that the bulk of the league is slower, causing certain good teams to stand out more prominently.

Vernon unquestionably is stronger than last season. Tet there is
San Francisco, which on paper and in general smoothness of action

nardly measures up to last season's standard, soing at a merry and almost pennant-winning clip.

Sait Lake and Portland are stronger than in 1921; Seattle, Sacra-

mento and Oakland weaker. Yet there seems to be more soft spots than ever before. Too many clubs are not playing up to their ability.

Los Angeles stacked up at the start as superior to the 1921 chantpionship combination. Some claim there is too much age on the club. Probably not more than on others, and a younger average than last season. Something is lacking somewhere,

This figures too good a league for one or two teams to pull away from the field. October may find them more closely bunched, but there is nothing at present to indicate such a development. Vernon has shown a lot of class. San Francisco is up there so

way, although for the most part in their local appearances the Seals have shown anything except championship form. Personally we doubt whether the speed of the league varies as

preciably from year to year, despite the unfailing annual spring annuuncement of every manager in the circuit that "My club is 20 per MONROE AT EL RIO cent stronger than last season." On that basis the league is 400 per cent stronger than when it started. What must it have been in the beginning?

Several of Seattle's exhibitions here this season have been in the nature of a travesty. Portland played poor bell, but it had the excuse of a riddled line-up. Still this doesn't explain the work of some of the outfielders. Some of the plays out there were charitably chalked down as "misjudged fly balls." Frankly, it looked more like a case of no great effort to get the ball.

For some reason one finds more sustained effort among the sec ond division and tailend clubs in the majors than among this class of teams in the minors. They may not win more games, but they make harder fight in individual games.

Possibly the managers are harder drivers, the discipline more se vers. Perchance it is mersely the atmosphere of big time or the latent heaviness of the attack. Nothing particularly unusual to see a tallend team knock off a leader in a series up there. A manager may know that he has the best team in the majors, yet he never feels certain of winning any game, or even reasonably sure of it.

COMMISSIONERS SILENT ON BOUT

The New York State Boxing Commission at its weekly meeting today took no action in regard to the sudden termination of the bout be-

termination of the bout between Benny Leonard and
Jack Britton last night which
was severely criticized by
sporting writers.
Commission officials announced that they were contemplating no inquiry into
the match which ended in
the thirteenth round with a
deciaton for Britten on a foul

Duke Kananamoku, the world's speediest human awimmer, will give local swim fans a chance to see him in action tonight at the Los Angeles Athletic club, when he will appear in two events at the hand of a card of squatic events arranged by Fred Cady, swimming instructor of the LAAC.

In the first race the Duke will be pitted against Walter Grace, the Pacific Coast fity-yard chempion, in a fifty-yard appears is speedy paddler himself, as his title implies, and will give the famous Hawailian merman some keen competition. However, this is just what Kahanamoku likes, "nothin' size but," and he will show the local fans some real speed.

A BEAL MATCH

The other event in which Kahanamoku appears will be a 160-yard awim. Catherine Tufts, Dot Waters and Phyllis Barton are scheduled to clash in a 100-yard swim for women will bring together Viola Hartmann, Marje Curtis, Helen Vernon and Lois Barry, four mermaids who paddle a wicked fin.

Haig Prieste. Ralph Summeril and Walter Krisel will put on a men's diving exhibition and then will show the sould like nothing better than a victory over the Duke, and will be suit to get what he wants. The Duke has other views as to coming in second and has no idea of letting the local swimmer capture his laurels.

Aside from the two special avents in which the Duke appears, are several other races that should bring out a lot of excitement. In the 100-yard free-style Jack Rob-ores from the two special avents in which the Duke appears, are several other races that should bring out a lot of excitement. CARDS' CATCHER HAS BROKEN RIGHT HAND

ST. LOUIS (Mo.) June 27.—
Vernon Clemons, catcher for the St. Louis Cardinals, is suffering from a probable broken bone in the palm of his right hand, which may keep him out of the game for a long period. Clemons's injury leaves the Cardinals with Eddie Ainsmith as their only experienced catcher.

GRAPPLERS FINISH UP TRAINING

Miller and Miyake Set for Their Wrestling Match Tomorrow Night

Walter Miller will vibrally so on trial tomorrow evening when he takes on Taro Miyake in the gymnasium of the Los Angeles Athletic Club. The principals are Athletic Club. The principals are two of the craftiest grapplers in Miyake will bear close watching

and Miller is aware of this. The Japanese marvel has defeated some of the best men in the country and he is out to give Miller a thorough lacing tomorrow night.

try and he is out to give Miller a thorough lacing temories might. Whether Miller will be able to cope with the Jap's uncanny tricks will prove of considerable interest to the fans.

The mat experts will wind up their training today, light workouts being the rule. They are said to be in A-1 shape and both are anxiously waiting the sound of the opening gong.

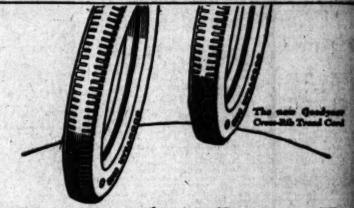

Waiter Miller, claimant of the world's welterweight wrestling title, announced last night that he would not meet the winner of the Ted Thye-Johnny Meyers bout alsewhere than in Los Angeles. Miller's statement was made in answer to a challenge wired from Sporkane, Wash, to the Los Angeles. Athletic Club grappler, which requires that the bout be staged in Spokane for a \$1800 guarantee. The local wrestler bases his refusal on the ground that he made a trip to the Northwest several months ago to meet Thye, but he was forced to cancel the match because the promoters failed to live up to their financial agreement.

A New Tread - a Lower Pri Reliable Goodyear Quality

Here is a new Goodyear Cord Tire—a big, sturdy, long-wearing tire—that sells at a price lower than you are asked to pay for many "long discount" tires of unknown value. It has a different tread from the famous Goodyear All-Weather Tread Cord—a new tread with a deep, clean-cut, cog-like pattern—and it sells for from 20 to 25% less.

It has in it the same high-grade long-staple cotton, the same Goodyear patented group-ply construction, the same liber ally oversize dimensions.

When you buy the $4\frac{1}{2}$ -inch size, for example, you get a tire whose actual measurement is nearly 5 inches.

Don't confuse this Goodyear Cross-Rib Tread Cord with other popular-price cords which sell at the same price or for slightly more.

In many cases, these other cords are made of inferior ma terials, with short-staple cotton as a foundation. Get the tire that is good enough to carry the Goodyear name, that is built to safeguard the world-wide Goodyest

All of the Goodyear Service Station Dealers listed h have the Goodyear Cross-Rib Tread Cord, as well as the famous All-Weather Tread Cord, ready for you now.

Compare these prices with NET prices you are asked to pay for "long discount" tires

SOFT PICKINGS FOR YE TIGERS

pressed heavily on the plate. Saw-yer teased a walk out of Kallio, which with French's single and a iwo-bagger by Truck Hannah, superinduced two more runs, and gave Kallio the impression that this is a hotter place than the thermometer indicates. James, ninth up, grounded to the box. On the golf links Bill's effort with the bat would have been a success as it was a perfect put. SURE DID SWEAT

sas it was a perfect putt.

SURE DID SWEAT

With Kaillo cozing perspiration from every pore. Reiger was making a violent effort to work up a sweat in the buil pen. Much depends on the condition of mind. Reiger took hold at start of second, but it was not until the fifth that the dew of warm dampness began to appear on his alabaster brow. Vernor cunted two in that inning. Chadbourne opened with a single, taking second when Wilholt jurgled the drive. Hawks sacrified, Tigers had so many now that they could afford to play for one run. But again they got more than intended. Bodie singling Chad across, while Ping scored on Hyatt's daily triple.

The Vernon seventh witnessed what might best be described as a serial of a twelve-reel play. Chadbourne walked, and Hawks sacrificed him to second. Ping then politicly evacuated the base, inviting Chadbourne, who beat it back to second, only to find that base covered by Bodie. Ping then politicly evacuated the base, inviting Chadbourne to stand on it for a time. This chivalrous act cost Chad proved equalty Chesterieldian, and urged Ping to step on the base and rest his feet for time. This chivalrous act cost Chad his life on the bases, inviting Chadbourne to stand on it for a time. This chivalrous act cost Chad his life on the bases, inviting Chadbourne to stand on it for a time. This chivalrous act cost Chad his life on the bases, inviting Chadbourne to stand on it is considered the base in the condensed form would be able to catch sifter man, Maury Shick came in from center field and made the put out. This double frum-down play read something as follows: Sand to Lazarre to Sigiin to Sand to Reiger to Strand to Sand t

Schiek.

Vernon gave marvelous display of defensive work in the eighth. Sigiin's double, a single by Strand and a pass to Wilholt, filled the bases with nobody out. This was followed by the unusual spectacle of three fairly long files to the outfield and not a man scoring. Lewis lofted to Chadbourne in center. Chad cut loose with a throw that turned Sigiin back to third, the ball bounding directly into the mitt of Truck Hannah, whose ample hoofs were deployed in such a way as to guard the plate had anybody attempted to reach same. Lasarre lifted a fly to Hawks in right, and again there was a rife shot into the mitt of Hannah, holding Siglin at third.

the SAVAGE GURD IS BUILT TO EXCEL

This tire has startled motordom with its remarkable performance on stage lines and other hard runs. There is nothing freakish about its construction, nor is it built by any so-called secret process. It does, however, embody the best known practices and latter-day attainments in cord tire construction. It has been built to be the world's foremost and

attainments in cord tire construction. It has been built to be the world's foremost used tire—built up to a standard for quality and not down to a price.

The men and metorists familiar with t're construction will find in the implicitly exercit illustration above, aside from pleasing appearance and design, seventeen outstanding constructional features that make the Savage Cord the remarkable tire it is.

Other good makes of tires, to be sure, may use one or more of the features enumerated for this tire, but the Savage Cord is the only tire we know of that embodies them all.

2. Stretched rubber is cut more readily than rubber under compression. The Savage Cord Tread is so designed that the rubber is compressed under our weight, thus increasing its resistance against sharp rocks, glass etc.

3. Shoulders of the tread are scientifically impered instead of dropping off abuptly. This strengthens and guards against separation and breaking down at this point. The extra thickness of rubberhers gives maximum protection against rut, wear and similar abrasive actions.

4. Our Breaker Cover makes an efficient!
bond between the tough, wear-resisting rubber of the tread and the soft, resiliant rubber of the cushion and breaker strip.

5. Our Breaker Strip is designed especi-ally for the Savage Cord. Its weave gives maximum protection, absorbing read shocks and preventing tread separation.

6. Generously heavy sidewalls of the same compound as the tread protect the excess sgainer rat wear and deterioration from water, oil, etc.

A pure gum cushion extends clear down to the beads, cushioning and acting the sides as well as the top of the

8. The Savage Bead Cushion is a prostection against rim chaffing.

1. An effective treed design provides traction, lateral stability and speed—all the ideal non-skid features with none of the disedvantages of some designs.

9. In the sizes most subject to overloading and abuse the Carcass contains two more piles of cord fabric than the average cord tire. For example, the 5-inch has 15 piles, The average 5-inch tire has only 5 piles.

10. Pure gum friction around and between cords gives that carcase maximum elasticity and resiliancy.

11. Two chafing stripe of equare woven fabric, so constructed that the cord carcase is gradually stiffened as it approaches the hard bead, prevents the common "hinge" and resultant blow-outs above the beads.

12. The Savage system of interlocking EVERY ply of cords securely holds the beads. It takes longer to build sires this way then by the usual methods, but we thereby give maximum protection against blow-outs so common to that points.

14. No adjoining piles have cords runing in same direction. This method
requires more time for construction for it
necessitates the application of only one ply
at a time. We feel the additional time is
justified by the greater carcase strength
secured.

15. Our tire has a larger sectional dis-ameter than the average cord. 16. Both chaffing strips extend up to this point instead of stopping at the toe of the bead. This method locks our bead

17. It to Built to Excel.

A New Teakettle Take the same care of the tea-kettle as you would any other ves-sel. Wash and dry it after each time it is used, and the lime will not cellect in it.

When Storing Leather

Do not put leather articles in a trunk that is to be closed for a length of time, They are apt to mildon.

The best plan is to wet and well soap it, then lay it on some hard surface and scrub with a hand brush. This will thoroughly clean it and will not hard to

With Peggy Joyce Hopkins and Ellnor Glyn both elucidating life's which really successful wives would be untrammeled by the exilitie problems for women we realify have no excuse for bungling. True, both ladies are allittle skeekly in their advice, higher than the street of monthly bills. That is problems for women we realify have no excuse for bungling. True, both ladies are allittle skeekly in their advice, higher than the street of monthly bills. That is problems for women we realify have no excuse for bungling. The street was a to how to wear emotions gowns and French underwear and to make the problems of a street of the initial complications and the multitudinous details for ourselves as best we can, so that each of us must ardently wish we had as far as they so, they ought to be very helpful.

However, as both Peggy and a man the street of the monthly bills. The street of the stree

and the Needle

reflected in its needlework! The regal purple "buoidered in gold" of Egyptian supremacy-

the extravagant tapestries of the great Louis XIV period of inxury -the fine Flemish laces worn by cavaliers of the Renaissance at its height—and the elaborate, painstaking ecclesiastical designs prior to 1600-all carry the reflection of their periods.

Needlework-the oldest art in the world-an art that the feminine half of the world enjoys so deeply and that adds so materially to the comfort of the masculine shalf-cannot be taken too lightly.

In America, today, practically every one of our 35,177,515 women and girls does some type of needlework, and millions are spent on floss, thread, trimmings, textiles and all types of needlework supplies.

Carrying on the art of the needle

has been carrying on th work art in America.

Needlework editors of Modern Priscilla are in constant touch with developments in European centers, and are continually planning and evolving new designs and new stitches. Color schemes are studied, and the fascinating intricacles of modern art are reprented. Every needlework design shown in the pages of Modern Priscilla is completed, stitch for etitch, before appearance,

The largest and most comprehensive needlework department of all leading women's magazines is featured regularly in Modern

San Diego Army & Navy Academy

Notice

An Appreciation

Simply the presence of the many friends who attended the opening of our new West Seventh Street Building would have been immensely gratifying. But they added an unqualified approval of arrangement, appointments and decoration that completely filled the measure of our satisfaction.

We are happy to regard the opening as a success in every respect, and to acknowledge with sincere appreciation the many good wishes and kind remembrances which marked the occasion.

As to the future, may we not reiterate our attitude as set forth in the booklet announcing the opening:

The words "Visitors Welcome" bear a special significance in relation to the opening of our new building. But, we urge that you regard them as addressed to you continuously, so that, whenever you may so incline you will feel free to visit our establishment, linger in any department and never sense the slightest obligation on your

Mindred Davis to Star

The black-and-blue comedy is to lose another lovely young exponent, when Mildred Davis, who has played Virginia to Harold Lloyd's Paul during the past three years, completes her contract with him on July 1.

It is now practically settled, according to reports from authoritative sources, that Miss Davis is to head her own prediucing company, and that she will appear in five-real comedy-dramas. The pictures are to be made at the Roach studios, and Hal Roach is to direct the first.

Miss Davis has appeared as lead in one Lloyd feature since "Grandma's Boy," which is now showing at the Mission Theater.

Early Days

Strong Stuff cisco are vividly brought to life, with all their mixed strain of chivalry and brutality in "The Gray Dawn," photoplay feature at Panlages this week. The picture is primarily a thriller, but its setting and costuming give it a romantic air that takes the edge off the

WRITERS' CLUB TO HAVE OWN CENTER OF DRAMA

new center for play premiere is in prospect for the forthcoming than a theater to be built at the Writers' Club, the organization made up of members of the lit

made up of members of the literary profession, especially those associated with the screen.

The playhouse is to form part of the present establishment of The Writers, on Sunset Boulevard, near Highland avenue, It will be of the Little Theater type.

Here will be produced plays, written by playwrights belonging to the club. In the productions will appear members of the organization, as well as the octors and actresses of the screen.

Tremendous interest has been aroused in the project all over the realm of the films, and it is anticipated that the inattiution will give a new and brilliant prominence to Los Angeles in the spoken drams. Some of America's most gifted playwrights are members of the Writers' Club.

Riverside County Agrees to Co-operate

GO HALF WAY

The Board of Supervisors of Riverside county yesterday voted to go half way with the State Department of Africulture in bearing the expense of having a plant quarantine inspector at Blythe.

Cars containing cotton assed shipped into California from Arisona for milling purposes are to be subjected to a steam sterilizing process before the product may be unloaded, according to the proposed change in the regulations.

Don C. Mote. of Phoenix, entomologist for Arisona, spoke of quarantine regulations in that State, declaring that on some of the main highways, Arisona as yet supplies only a 13-hour inspection and expressed his belief that it was possible for some vehicles to get through to California without inspection.

have been reappointed by the
Supervisors to two-year terms on
the County Board of Education.

GETTING RID OF HOUSEHOLD PESTS

Even careful housekeepers at times have trouble with auts, cockroaches, fleas, flies, moths, rats and mice. The popular free govern-ment booklet, "Houseclean-ing Made Easier," in addi-tion to other valuable information, tells how to elim-inate these household pests. Write name and address clearly on the coupon, inclosing 2 cents in stamps for return postage, and send to Los Angeles Times' Information Bureau, Washington, D. C. To avoid wrong delivery at Washington use full address as given. Do not send to The Times' Los Angeles office.
